EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows: The claims 2-3 being non-elected claims without traverse have been cancelled from further consideration.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: Claim 1 is allowable because the prior art of record fails to disclose or suggest or teach the recited proportional flow rate control valve responsive to an external signal for changing an area of discharge-side or suction-side refrigerant flow passage, and a constant differential valve for controlling a flow rate of refrigerant introduced from a discharge chamber into a crank chamber or refrigerant permitted to escape from the crank chamber to a suction chamber such that a differential pressure developed across the proportional flow rate control solenoid valve is constant, to thereby control refrigerant delivered to the condenser to a constant flow rate.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
